

Petition to Re-Classify Assisted Living Homes as Residential Facilities

Petition summary and background	Prior to October, 2013 Assisted Living Homes were classified as Residential Facilities which allowed for an environment which could provide care for seniors in a comfortable, home-like environment. In October, 2013 homes were re-classified as Healthcare Facilities, which not only does not allow for the home-like environment but also puts undo requirements on the home related to building codes, OSHA and HIPAA which could eventually lead to assisted living homes no longer being able to stay in business.
Action petitioned for	We, the undersigned, are concerned citizens who urge our leaders to act now to reclassify assisted living homes as residential facilities to continue to promote quality care for our seniors in a home-like environment.
